

Oussama Labrahmi

Senior Product Engineer · Web platforms and AI agent workflows

Remote, CET hours · Rabat Metropolitan Area, Morocco · oussama@labrahmi.me · +212 6 91 04 14 74 · [linkedin.com/in/olabrahmi](https://www.linkedin.com/in/olabrahmi) · labrahmi.me

SUMMARY

Six years shipping production web platforms for enterprise and startup clients, including PAYBACK, Takeda and Descope. I own features end to end: architecture, tests, monitoring and on-call. Now building agentic coding workflows and applying the same rules to them: guardrails, human review, and measured results.

AI WORK

Shaza · WhatsApp booking agent for hotels

2026 · Own product

- AI agent that handles hotel guests on WhatsApp end to end: answers questions, checks live availability with the hotel's channel manager, and books the room in the chat. 20+ confirmed reservations from hotels in Morocco.
- Built on a self-hosted n8n server with a detailed system prompt encoding each hotel's rooms, rates, policies and hand-off rules.
- Split models for cost: Claude Sonnet for reasoning and tool calls, Claude Haiku for guest-facing replies. Availability always comes from the channel manager, never from the model.
- Next.js admin dashboard for hotel staff (Drizzle, Neon Postgres).

Maya · coding agent pipeline

2026 · Personal project

- Turns Linear tickets into pull requests: webhook, BullMQ/Redis queue, isolated git worktree per ticket, headless Claude Code agent, lint and test retry loop, PR via GitHub CLI.
- Human approval built in: the agent can open PRs but never merge. Linear status updates and Telegram alerts on every run.
- Runs Claude and local models (Qwen on Ollama) on the same pipeline.

EXPERIENCE

Senior Frontend Developer · iMedia24, client PAYBACK

Aug 2025 – Present · Remote

- Own the frontend of [PAYBACK](#)'s enrollment (sign-up) flow, a priority 1 feature used by 1.1M+ visitors a month and relied on by partners including dm, Netto, EDEKA, Decathlon and Aral.
- Next.js and MUI inside an NX monorepo, in a micro-frontend setup where each team owns its slice. Content in PayloadCMS, infra on GCP with Terraform.
- Ship behind Playwright end-to-end tests, Vitest unit tests and strict code review. Set up Datadog SLOs and synthetic checks for the login and sign-up rollout.
- On the 24/7 on-call rotation one week every month: I respond to production incidents at any hour and ship fixes to keep the platform at 99.9% uptime.
- Coach backend-focused teammates to ship frontend work, in a team spread across Germany, Poland and Morocco.

Frontend Developer · Bejamas

Jan 2023 – Jul 2025 · Remote (Warsaw)

- **Descope** (led the frontend, 2023–2025): redesigned descope.com (Next.js, Contentful, Vercel), passing Core Web Vitals on mobile and desktop. Built docs.descope.com, 1,500+ static pages on Fumadocs covering 20+ SDKs. Shipped globalmcphackathon.com for Descope's hackathon for AI developers on a fixed deadline, plus descope.ai.
- **Charm Industrial** (led the frontend, 2023–2025): rewrote charmindustrial.com from Gatsby to Next.js, with pages 50%+ faster and conversion up 30%. The site serves 100k+ visitors a month and processes hundreds of thousands of dollars monthly through Stripe at 99.9% uptime. Built an internal dashboard streaming live factory camera feeds (Next.js, Express, HLS).
- **Takeda**: one of 30+ engineers rebuilding takeda.com (2M+ monthly visitors) from PHP to Next.js, Tailwind and Sanity. Built reusable sections in a library of 100+ that editors use to assemble pages.
- **o1Labs**: built sections for o1labs.org in a 50+ section Sanity library with instant revalidation on publish.
- Wrote decision records for every project so the next team could pick up the architecture.

Co-founder · Dali

2026 – Present

- Building a toolkit for content creators: AI content ideas, contract and invoice generation, and brand payments. Own the full stack on Next.js, PostgreSQL and Prisma.

Freelance · Akasec, 1337 Khouribga

2023 – 2025

- Build cyberodyssey.akasec.ma, the site for Cyber Odyssey, Morocco's largest yearly cybersecurity event, from scratch every year: live agenda, ticketing with emailed QR tickets, and a volunteer check-in app that validates each attendee's role. Hardened for a security-savvy audience.
- Built akasec.club with Next.js and GSAP.

Earlier

- **Lead Frontend Developer, WebMastry** (2022): Next.js and TypeScript frontends, a NestJS/Prisma REST API, mentoring.
- **Frontend Developer, Pickmeup** (2022, remote for Los Angeles): rewrote the main site in Next.js, built a rider admin dashboard.
- **Founder, MediaEthic** (2020–2021): small studio building client products in React and NestJS.

SKILLS

- **AI:** Claude Code, Cursor, n8n, Ollama (local LLMs such as Qwen), agentic coding pipelines, prompt and context engineering, human-in-the-loop design
- **Frontend:** TypeScript, React, Next.js, MUI, Tailwind, NX, micro-frontends
- **Backend:** Node.js, Express, NestJS, PostgreSQL, Prisma, Redis, BullMQ
- **Infra and quality:** GCP, Terraform, Vercel, Cloudflare, Datadog (SLOs, synthetics), Playwright, Vitest
- **CMS:** PayloadCMS, Sanity, Contentful, Storyblok, Fumadocs

EDUCATION

Computer Science · 1337 (42 Network), Morocco · 2021 – 2023
